(October, 2018)
TCP-1252 PC-10, Olive Drab #2- WWI Bi-Planes
(October, 2018)
TCP-1253 PC-12, Brown-Green- WWI Bi-Planes
(November, 2018)
TCP-1254 BC-05, Yellow Doped Linen- WWI Bi-
Planes (August, 2018)

Recommendations

Tru-Color Paint® recommends a pressure of 28-35 psi for most airbrushes, with a medium tip. Age of the airbrush and the tip size will cause the starting pressure to vary. We recommend the use of TCP-015: Thinner, if thinning the paint is desired. Clean-up is easily achieved with acetone (unscented nail-polish remover.)

TCP-310 (Retarder) can be added to our paints to slow down the evaporation of the solvents in areas with temperatures that exceed 90° F (or 32.2° C.)

Our Paint

Tru-Color Paint is a solvent-based acrylic paint. Acrylic stands for the polymer used to bind the pigment to your model. All Tru-Color Paint products are manufactured in the Phoenix, AZ, USA, to exacting standards.

Paints in these military-model series are specifically designed to be air-brushed, using most standard air-brush systems.
